

Domain Names

Register the right domain at a fair price

- Consistent, low pricing with no hidden fees
- Complete DNS management
- Support around the clock
- Free email and web forwarding

Domain pricing: (call for price).

Fair pricing

Register your domains at low rates that stay the same year after year, with no hidden fees and no surprise renewal increases.

Simple transfers

If your domains are registered elsewhere, move them to us and start saving on renewals.

Manage everything in StackCP

Our own control panel, StackCP, handles every part of domain management: full DNS control, web forwarding and managing many domains together.

Help whenever you need it

Our support team is available 24/7 for questions about domains.

Search for the right name

The search tool checks thousands of available domains so you can find a name that fits your site.

Keep your details private

Registering a domain normally puts your contact details in the public WHOIS database. Our Domain Privacy service keeps them hidden.

Put your domain to work

Combine your domain with our web hosting, professional email and other services to build a stronger presence online.

Why every business needs a domain

It signals credibility

Social media profiles help, but your own website shows customers you are a serious business and builds trust.

It protects your brand

Owning the domain that matches your business name stops others from using it and gives your brand some protection.

It puts you in the market

Customers expect to find businesses online. A domain gets you ready to sell to a growing online market.

It gives you professional email

An address such as you@yourbusiness.ca looks more trustworthy than one from Gmail or Yahoo.
